

Previewing In TerminalFour

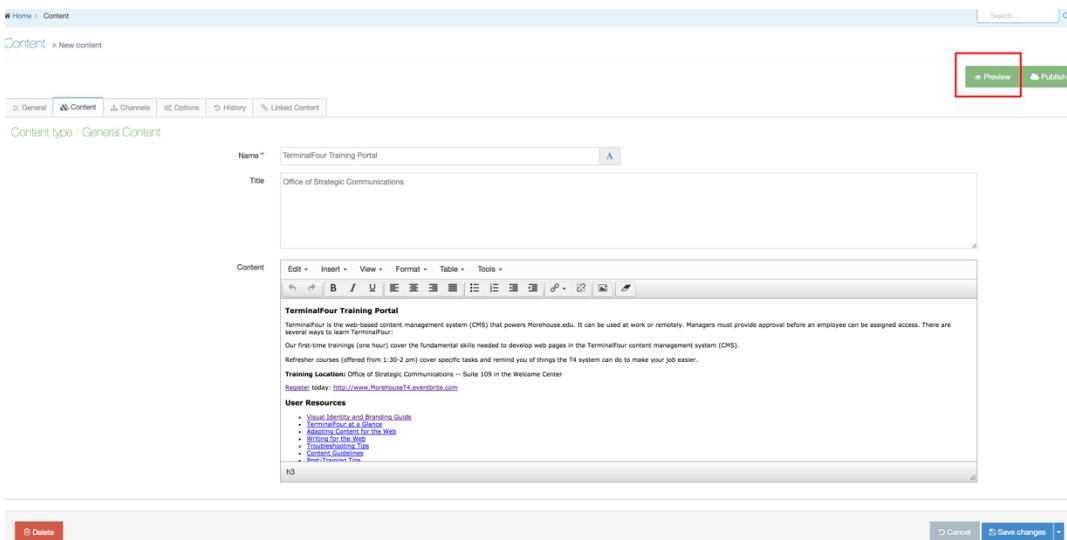

There are several ways to Preview content in T4. Previewing allows you to get a look at how your page will look after edits have been made and it has been published.

Previewing Content

1. In the main content view, right click on the Actions menu in the top right corner of the page. Select Preview.

2. When working on content in the Edit Content mode, click the green Preview button at the top right of the page.

Previewing In TerminalFour

Previewing a Section:

3. In the Site Structure view, choose the Actions menu across from the section you would like to preview. Click on the arrow and select the Preview Section option.
